

PSCI AUDIT SERVICES

Verify that your pharmaceutical and healthcare suppliers comply with sustainability requirements by auditing to a recognized industry standard

BUSINESS CHALLENGE

Stakeholders and legislators are continually raising the bar in terms of transparency in the supply chain. Social and environmental issues affecting the pharmaceutical and healthcare supply chain include bribery, corruption, working hours, air quality, toxic materials and water usage. As consumer-facing businesses, these companies need to ensure their suppliers are acting responsibly at every stage of the supply chain.

ABOUT PSCI

Formed in 2006, Pharmaceutical Supply Chain Initiative (PSCI) is a non-profit business membership organization that promotes responsible supply chain management across the industry. PSCI created the Pharmaceutical Industry Principles for Responsible Supply Chain Management to set out relevant practices across five key areas: ethics, labor, health and safety, environment and management systems. All businesses operating within the pharmaceutical supply chain are expected to uphold these principles. PSCI currently has more than 50 members.

AUDITS WITH BUREAU VERITAS

Bureau Veritas offers audit services for PSCI as part of its comprehensive Corporate Responsibility & Sustainability certification offer. Building on our extensive experience auditing pharmaceutical companies worldwide, we offer various audit schemes covering Social, Health and Safety, Environment, Good Manufacturing and distribution practices for pharmaceutical and healthcare industries.

PSCI AUDIT SERVICES

BENEFITS OF PSCI AUDITS

Sustainability

Ensure your suppliers comply with your requirements, benefiting from Bureau Veritas' extensive experience in social and environmental auditing

Reputation

Become a recognized supporter of responsible supply chains, boosting your reputation through a strong commitment to sustainable outcomes

Improvement

Help build supplier capability to implement the PSCI Principles, promoting responsible business practices throughout the supply chain

Efficiency

Share audits on a web-based platform, reducing the audit burden and leading to efficiency gains for both suppliers and members

FREQUENTLY ASKED QUESTIONS

What is PSCI's vision?

PSCI aims to promote responsible practices that will continuously improve ethics, labor, health, safety and environmentally sustainable outcomes in the supply chain. Its member companies have joined forces to drive complex, global change in terms of responsible supply chain management and better business conditions across the industry.

What does PSCI do?

PSCI provides a common voice for the pharmaceutical and healthcare industries, setting standards for ethics, labor, health and safety, environment and management systems. This includes defining common supplier assessment tools such as audit frameworks. PSCI carries out audits and promotes audit sharing to enhance efficiency and drive continuous improvement.

What is the purpose of PSCI audits?

PSCI audits assess a supplier's performance against the PSCI Principles as well as international standards and agreements, and local regulatory requirements. PSCI aims to ensure that its auditing model and tools become the industry norm.

Why participate in shared audits?

The PSCI Shared Audit Program allows supplier audits to be shared among PSCI members via a web-based platform. This means fewer audits for each supplier, resulting in greater efficiency for both suppliers and members. Shared audits offer greater visibility of patterns, trends and areas for improvements within the supply chain.

WHY CHOOSE BUREAU VERITAS?

GLOBAL

A certification leader present in 140 countries and recognised worldwide

SPECIALIZED AUDITORS

With strong pharmaceuticals sector expertise

TRAINING

Our auditors receive regular skills training
