

SHRIMP SUPPLY CHAIN

Ensuring traceability, food-safety, quality and sustainability

BUSINESS CHALLENGE

The shrimp supply chain is made up of fragmented suppliers from many countries. This makes ensuring traceability & quality a complex process. Aquaculture is growing fast and is likely to face challenges regarding environment impact, diseases, as well as safe feed and larva supplies. Today, NGOs and consumers demand greater sustainability for shrimp products. In this context, retailers and restaurant chains, highly mindful of food safety, are looking for proof of sustainable sourcing. How can you demonstrate that your shrimp supply chain is secure?

OUR SERVICES

Bureau Veritas offers a range of services all along the supply chain, and also customized solutions to meet your needs:

Laboratory Analysis: chemical (bisulfites, medication & pesticide residue, etc.), microbiological (salmonella, vibrio, listeria, etc.), organoleptic and metrological testing

Product & process inspection: at each stage of the supply chain, traceability, cold chain, quantity, hygiene, freshness, grading & quality verification are assured

Supplier audit: second-party audit is based on regulations or client specifications

Aquaculture certification: based on recognized standards : EU **BIO** /organic regulation, **ASC** (Aquaculture Stewardship Council), **BAP** (Best Aquaculture Practices), **GlobalGAP**

Processing Certification: BRCGS, IFS, ISO 22000, FSSC 22000, ISO 45001, SA 8000, ISO 14000

SHRIMP SUPPLY CHAIN

CASE STUDY : ASC SHRIMP AQUACULTURE FARM IN VIETNAM

Thuan Phuoc Seafoods and Trading Corporation is one of the leading seafood producers and exporters in Vietnam, pursuing a strategy of sustainable development. The company has always focused on quality, safety and social accountability to meet clients' strict requirements. With the ASC Standards, we make our strong commitment known to our clients all over the world. The ASC standards not only help protect communities and the environment, but also contribute to ensuring the ongoing viability of the aquaculture industry. Presenting the ASC label on our products strengthens our position in existing markets and taps into new ones while enhancing market value through greater credibility among consumers. Bureau Veritas has supported us as a reliable partner for many years. With its extensive experience and knowledgeable experts, the company offers effective services to help us continuously maintain and improve our system.

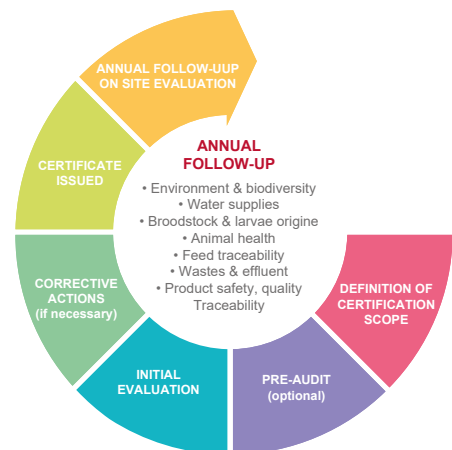

OUR CERTIFICATION PROCESS

- Adapted to selected certification standards (ASC, BAP, Global GAP, etc.)
- Evaluation protocol is compliant with accreditation requirements

- Certification cycle: 3 years

** for Certificate issuance, all major non conformities (if detected at initial audit) must be closed with effective corrective actions.*
